# PIA-OKF

Cost-effective industrial RIO with 8 relay output channels, 8 wide range digital inputs and isolated RS-485 interface

Additional functionality through extension modules

- 110/220 VDC digital inputs
- Universal analog inputs
- 3-phase system analysis
- EV charging
- Extended battery backup

Industry standard interfaces

- Modbus (TCP slave, RTU master)
- ROS
- MQTT

zone-C rated

complex systems

railway environment

standalone operation

ROS compatible
